

## APPLICATION OF DEL'OR PRODUCTS

Applying the DEL'OR products is not difficult, but there are a few points that need to be born in mind.

Here is a brief summary of the procedure that you need to follow in order to apply the 6 different sachets that are part of the complete DEL'OR treatment.

First, prepare the following:

- ✚ Bowl of water
- ✚ Head band
- ✚ Towel
- ✚ Sponge or cloth
- ✚ Soft brush
- ✚ PACK OF DEL'OR PRODUCTS
- ✚ DETA-COSMO & DIAGRAM

**Follow the simple steps below:**

### **CLEAN THE FACE FIRST**

It is very important to really wet the face, literally soaking it with a soft sponge or cloth. Either get the client to hold an empty plastic bowl under their chin while the water is being applied, or if there is a sink nearby ask them to go and really soak their face well. Do not dry the face – leave it as wet as possible.

### **1. BOOSTER FACIAL SOAP**

Using a small quantity of Del'or facial soap, first work it a little with your fingers and then apply it on the face directly with your fingers. Work with plenty of water, using circular motions.

Wipe off with a soft cloth or small flannel any soap that may be around the neck. Apply using upward & outward motions. Spend about 2minutes cleaning skin.

*The Del'or Facial Soap contains micro-particles of silicon that are distributed over the surface of the skin to absorb impurities and dead cells of the skin.*

## **2. BOOSTER EYE MASK 24K**

Before applying the Eye Mask, it is important to soften the square pack by applying firm finger pressure for about a minute to activate it and soften it. Initially, it will feel quite hard, but by “massaging” the sachet for about a minute it will soften.

The Eye Mask must be applied quickly and efficiently, otherwise it will harden in about 5 minutes, so you need to complete the whole face in about 4 minutes or so.

One sachet is ample for two faces, so if there are two clients being treated at the same time, it is only necessary to apply one sachet only. If there is only one person, then you can apply the whole sachet on only one person.

Make certain that the person treated has their eyes closed throughout the whole procedure and take extra precautions NOT to get the mask in the eyes as it could sting and be very uncomfortable. If this happens by accident, wash the eye out immediately with plenty of water.

When applying the Eye Mask, it is best to use a small spray bottle with mineral water to keep the face moist.

Use your fingers carefully to apply around the eyes and crevices while maintaining the eyes closed throughout the whole procedure. Make certain that you leave no gaps, coming as close to the eyelashes as possible.

It is important to leave no gaps, as the nano-particles all interconnect to form an active matrix that works on the principle of physics literally stretching the skin. The basic principle is that the matrix of nano particles formed will ground the autonomic nervous system, therefore allowing the penetration of the nutrients from the epidermis (outer layer) into the deeper dermis – this would not normally be possible using normal creams that did not ground the autonomic nervous system. This is one of the secrets of the Del'or range.

After completion, make certain that you wash your hands well to remove all traces.

The Eye Mask contains 24k gold nanoparticles created by the unique technology Delor, designed for the care of the sensitive area around the eyes . Contains pure 24k colloid gold and vitamins A and E. It strengthens the skin through the creation of an active matrix of nanoparticles. Reduces puffiness and dark circles under the eyes and gives a healthy look to the skin .With continued use fine wrinkles around the eyes disappear completely and deep wrinkles are less visible.

### 3. BOOSTER FACIAL MASK 24K

The Facial Mask also needs to be “massaged” for about a minute to soften it, much like the instructions for the Eye Mask.

This is applied on top of the Eye Mask, again covering all the face as well as the decolotage.

Keep the face moist by spraying with mineral water above the Eye Mask – as well as the upper chest

It is easier to squeeze the sachet and apply the Facial Mask on the back of the hand – it is easier taking it with the brush and applying it.

Start at the forehead and apply the Mask with the soft “splay” brush using upward motions. Small, upward, simple movements are required, 2-3 times for each stroke. Again, it is important not to leave any gaps.

Work up the neck, the throat and the chest area in the same way. As you apply you will notice the 24 K gold nanoparticles glittering, as will the Eye Mask that was placed previously.

Leave the Mask on for 20 minutes whilst using the DEVITA COSMO.

## USING THE DEVITA COSMO

**Programme number 1 – Skin Wrinkles** should be used as this helps to eliminate wrinkles and runs for 20 minutes consecutively. Follow the instructions in the manual for setting and operating the device.

The application of the COSMO is relatively easy - you simply use the Quantum light and follow the lines of the face using the Quantum light, as shown in the diagram opposite – these correspond to the lines of the muscle layers of the face.

The electromagnetic device or antenna (rectangular box) can be placed on any part of the body, but the chest or abdomen is fine, with the screen facing upwards as the antenna is at the back of the device. The body will also be getting the benefit of the electromagnetic waves emanating from the device, concomitantly with the Quantum light working on the face.

Use very slow motions, keeping the Quantum light about 1 mm above the skin – the person sometimes feels a little warmth. Start from the eyes and move up across the forehead following the lines. Work on half of the face first and then move to the other half.

Move up the neck, but avoid the thyroid where the adam's apple is located as you may over-stimulate it. Work on the whole face for the full 20 minutes, repeating the cycles until the program finishes.

After completion, wipe off the Mask with a damp flannel making certain that you remove all traces of the mask. It may be more convenient for the client to go to the bathroom and wash well over a sink.

The results will only optimize about 5 hours after the treatment has been completed.

#### 4. EYE GEL 24 K

After the face is dry, apply the Eye Gel around the eyes – use a quick tapping technique as this helps the Gel to absorb better. It will feel slightly sticky to the touch.

Eye Gel contains special capsules which nourish and refresh the delicate skin of the eyelids and the area under the eyes .

The Golden Matrix Eye Gel contains strong algae from the Dead Sea that stimulates the metabolic processes on the skin, as well as powerful antioxidants - vitamins C, D, E.

The Eye Gel helps to eliminate puffiness and dark circles around the eyes, smoothes the skin and makes it more elastic. Regular use prevents the appearance of wrinkles around the eyes , the skin regenerates and restores its natural shine.

#### 5. SERUM 24 K

Pour the Serum on your hand all over the neck and spread up – use firm movements and massage well.

Serum 24 K is for all skin types. It imparts moisture to the skin and creates an active matrix of micro-particles of silicon, so as a result the skin becomes smooth and silky.

Natural oils, plant extracts and molecules of pure 24k colloid gold contained in the Serum, moisturize and strengthen the skin. Serum 24 K activates existing antioxidants, which have a positive effect on the elastic fibers of the skin and protect it from harmful environmental influences.

Recommended for daily use and is ideal as a base for make-up.

#### 6. MOISTURISER 24 K

Apply the Moisturizer 24 K with your fingers as this helps to activate the nano-particles.

Massage firmly into the skin.

The Moisturizer 24 K is mainly for hydration and can be used if the skin is feeling dry.

This also makes a good product as a base for make-up and can be used as often as required.

Moisturizer 24 K is made up of a base of specific silicon Matrix enriched with vitamins, minerals and antioxidants. Vitamins A , C, E nourish and work as antioxidants and facilitate the recovery of the skin.

The minerals (from the Dead Sea) contained in the unique Moisturizer 24 K is a rich source of fatty acids and other active ingredients which protects the skin from UV radiation.

The 24k Moisturizer may be applied both as a day and a night cream and helps restore the skin structure and protects it from having deep wrinkles.

## **General Guidelines**

There are a number of ways to work, depending on how quickly one wants to see the amazing results.

Certainly every time you apply the treatment as mentioned above, you will see a result. If you are preparing for a big event and want to stun your guests, then you can apply the treatment up to 4 times in the same day with a minimum break of 30 minutes between treatments. The results are truly spectacular with this intensity.

Another intensive way of working is to do daily treatments for 14 consecutive days. This would really be the only treatments required for many years to come!

A less intensive protocol is to do 3 treatments per week for a month – this is equally as effective but not so intense.

After each treatment the optimal results are seen about 5 hours after the treatment is completed.
